120 Park Avenue
New York, New York 10017-5592

INVOICE #SPPM-0193

FOR SERVICES RENDERED

January 1993

Environmental Tobacco Smoke

- Worked with EPA policy officials to hold an interagency meeting on meta analysis technology for ETS and EMF.
- Began briefing other agency officials on the MBS/EPA interagency meeting on ETS and EMF.
- Determined the status of the risk assessment and plans for press conference releasing the risk assessment from EPA staff working on the risk assessment and from EPA press staff.
- Researched the non-cancer risk assessment issues related to the children's respiratory effects section of the risk assessment and proposed a strategy for pre-empting the release of the risk assessment on that issue. Drafted a press statement to this effect.
- Attended the EPA press conference on the risk assessment.
- Drafted a letter to be submitted to the President concerning the Executive order on smoking in Federal buildings.
- Drafted and transmitted letters to John Bailar and Alvan Feinstein concerning their participation in a meeting with EPA, DOE, NIEHS, CIRRPC and NCI concerning the ETS precedents which will impact EMF.

Risk Assessment Activities

- Commenced cataloging of existing ETS information for the purpose of developing an automated reference system.
- Researched and discussed with EPA staff the science issues behind EPA's decision to phase out methyl bromide. Determined that no docket will exist until the notice of proposed rulemaking is issued this summer or fall.

- Obtained a copy of the United Nations document which served as the nominal basis for the to-be-proposed methyl bromide phase-out.

- Researched the issue of risk assessment/cost benefit analysis requirements for environmental regulation in Florida. Contacted officials on the Senate Environment and Public Works Committee regarding the new EPA Administrator's testimony as well as officials in the Florida Department of Environmental Regulation and the appropriate committees in the Florida legislature.

- Obtained a copy of the proposal from the Florida Department of Environmental Regulation to be submitted to EPA for funding to conduct a comparative risk assessment.

Coalition Activities

- Contacted Department of Energy staff concerning their views on the letter describing how ETS risk assessment issues will set a precedent for EMF risk assessment issues.

- Worked with the Attorney General for the State of Nevada concerning the argument before the Supreme Court on whether exposure of prisoners to ETS is cruel and unusual punishment. Provided the Attorney General with information concerning the ETS risk assessment to enable her to address the issue when it arose in oral argument.

- Attended the Supreme Court argument along with EPA staff who had developed the risk assessment.

- Attended the confirmation hearing for the new EPA Administrator where she indicated that she would place a high priority on risk assessment and sound science issues.

- Supported the Heritage Foundation in development of a press piece on the risk assessment. Provided consultation with respect to the interpretation of statistical concepts used in the risk assessment.

- Obtained an update on the issue of a potential regulatory proposal concerning the payment of hazardous duty pay by the federal government to employees who are exposed to ETS as a matter of employment.

Indoor Air Activities

- Identified and researched the questionnaire submitted by EPA to the Executive Office of the President for paperwork clearance concerning EPA's Building Assessment, Survey and Evaluation Program.
